

## How to find a Lost Rezzar

Most of the time in SL when you think you have lost something it is actually hiding in your Inventory under a different name bundled with other objects. SL will bundle things if you return from your land, take more than one object at a time or delete many objects at once. This bundled item will have the name of one of your objects so then it appears the others are missing.

To find the missing Rezzar look in Lost and Found (if returned), Trash (if deleted) or Objects (If Taken).

1. Sort by Date (so the latest things are on the top of the list)
2. Look for the topmost item that has a "Yellow Broken Cube" to the left of the name  
These are easy to spot as they look like rubrics cubes with parts missing
3. Check the date of this item by high-lighting, then right clicking to select Properties
4. If it was made on the date and time you lost your Rezzar then this bundled item may contain your lost Rezzar.
5. Find some clear land, you may need a lot of space and drag this item from your inventory to the land. Many things will appear and your Rezzar may be amongst them.
